

ELECT 2022 Banner Component Template

Description: Full-width banner with image on right or left, headline, optional text, optional background image, and optional button. If button is not used, a link can be applied to entire banner. Image stacks above text on mobile view.

Page Usage: Homepage and anywhere throughout site where banners are needed

Quantity: as needed. Usually no more than two of this type of content on a page.

Placement: In order in list of content.

Notes: Main images for use on the banner should be square proportioned, and can either be 1) a square image or 2) an image saved on a transparent square background. Maximum image size should be about 800 x 800px. Illustrations are preferred over photos for main image; optional background image can be an abstract photo.

Colors should be selected for the Headline and Text, as well as the Button. Use color sparingly.

Instructions: A visual guide to filling out the template is on the following page. This is a stand-alone template and does not pull in additional content.

Name is also the headline of the banner, so type the banner headline in here

Select from in-theme headline colors

Banner text

Select from in-theme text colors

Select an in-theme background color

(Optional) Select Background Image. Should be 4h:5w ratio with maximum 2000px width. If you pick a background image, it will overwrite the background color.

Make sure the path/* formatter is selected

Select image from media library. Needs to be either a square image or an image saved on a square transparent background.

Make sure the image/responsive formatter is selected

Select from list of in-theme colors for button background

Select page for button link

(Optional) if not using a button, you can select a link for the entire banner below. Do not use both a button and an all-banner link.

Enter button text. If no text is entered, it will be assumed that button is not being used, and the button will not render.

Optional: enter the CSS styles for a Unicon (preferred) or Font Awesome icon to the right of button text

Optional: enter the CSS styles for a Unicon (preferred) or Font Awesome icon to the left of button text

Do not add an all-banner link if button is used. Use an all-banner link only if button is not used.
