

ELECT 2022 Event Countdown Box Template

Usage: any page on ELECT website

Quantity: up to four items pulled into a Banner with Event Countdown Component

Placement: component is usually at the top of the page.

Info: this template creates the boxes to be pulled into an Event Countdown Component. The content should be placed in a sub-folder below the page where the component is located. This content features a JavaScript countdown timer and is used for “days until” notices for specific events. To create a component with static/generic deadline boxes, use ELECT-2022 Event Deadline Box and ELECT-2022 Banner with Event Deadline Component instead of this set of templates.

Instructions: a visual guide to filling out the template is below. Note that there is an option to select “yes” or “no” for active countdowns. Selecting “no” will mean that the box should not be rendered on the published page. You may also want to make use of the Options tab in the content template to set the expire date of the content for the day of the event.
